

# Bodelac 9000 HP Alkyd Resin Enamel

## **General Description**

Nippon Paint Bodelac 9000 HP Alkyd Resin Enamel is an oil-modified alkyd paint, it is formulated to be used on metal. It has excellent hiding power, fungus resistance and weathering resistance. Anti-corrosion property will be enhanced when using with an anti-corrosion primer.

#### Features

- Easy application
- Anti-corrosion protection
- Tough and durable film
- Excellent adhesion
- Good flow
- Smooth finish
- Quick drying

Dry Film

Thickness:

30µm

• Weathering resistant to UV exposure and rain

White block Ninnen Point 1088 colour

- Fungus resistance
- Excellent hiding power

### **Recommended For**

- Primed metal surfaces
  - Doors
  - Railings
  - Grilles
  - Machinery
  - Furniture
  - Pipes
  - Metal beams
  - Frame
  - Fabricated metals

# Nippon Paint Bodelac 9000 HP Alkyd Resin Enamel

#### **Recommended Painting System**

Sealer/Primer: One coat of Aquatec 1900 Zinc Phosphate Primer or HDC 8048 Primer

Top Coat: Two coats of Bodelac 9000 HP Alkyd Resin Enamel

#### **Surface Preparation**

All surface must be clean, dry and free from oil, grease, dirt, contaminants, loose materials and rust. High moisture causes paint defect. The moisture content of substrate should be less than 6% or 19 determined by Protimeter.

Metal: For optimum performance, abrasive blasting in accordance to Sa 2<sub>1/2</sub> ISO 8501-1:1988 is desirable. The surface to be coated must be clean and dry. Dry brushing should be sufficient to remove dirt. Where abrasive blasting is not possible, mechanical cleaning to St 3 ISO 8501-1:1988 standard is acceptable. For galvanized surfaces, thorough solvent degreasing to SSPC-SP1 is necessary and zinc salts can be removed by fresh water wash and scrubbing.

- ♦ Ensure fresh air ingress while applying and before dry done
- High humidity and cool temperature will result in longer drying time

#### Limitations

Avoid painting when the temperature is below 5°C or the humidity is over 85%. Do not paint when raining and rain is expected during painting or drying process.

#### Clean Up

Wash painting tools with washing thinner immediately after use.

#### **Safety Information**

Keep out of reach of children. If medical advice is needed, get the product container or label at hand for easy reference.

Be aware of sanding dust / spray mist. Protective gloves, eye or face protection are highly recommended. Keep away from sparks, heat, open flames and any other ignition sources.

Eating, drinking and smoking should be prohibited in areas where the material is handled, stored and processed.

In case of eye contact, rinse immediately with plenty of water. For splashed skin, clean thoroughly with soap and water. Seek medical attention if indication persists.

If you experience difficulties on breathing, leave applied area and obtain fresh air. If difficulties continue, immediately get medical attention.

Product must always be stored in a ventilated, cool and dry place.

Tightly close product container after each use.

#### Flash Point and Ignition Point

Flash Point: 40°C Ignition Point: N/A

Note: The information given applies to the product and its performance under specific test condition. Due to the varied circumstances beyond our control under which the product may be applied, for specific applications, please contact Nippon Paint Project Sales Department. We reserve the right to modify our product specification without prior notice.
